

Matthias Wiese

Matthias Wiese is a mechanical engineer with the focus on Diesel Engines. Engine efficiency, emission control and safety are his core business ever since, in the automotive industry with “Siemens”, in the construction machine industry with “Linde” and now in the maritime industry with DNV GL.

After leading the approval center “Electronics and Automation” for 3 years at Germanischer Lloyd, he is now as “Director of Regulatory Affairs” for DNV GL, following the development of new Standards and Regulations, from the beginning of design of the rule until implementation into technology, including the final holistic certification of components, systems and vessels.
